BASIL RECALL

To our valued Customers:

The U.S. Food and Drug Administration (FDA), along with the Centers for Disease Control and Prevention (CDC) are investigating a multistate outbreak of *Cyclospora* illnesses potentially linked to fresh basil exported by Siga Logistics de RL de CV located in Morelos, Mexico. The FDA has requested a voluntary recall and the firm has agreed.

We want to assure our customers that Pacific Produce and its suppliers have not, and have never, purchased any basil or any other items from Siga Logistics.
